STONCOR

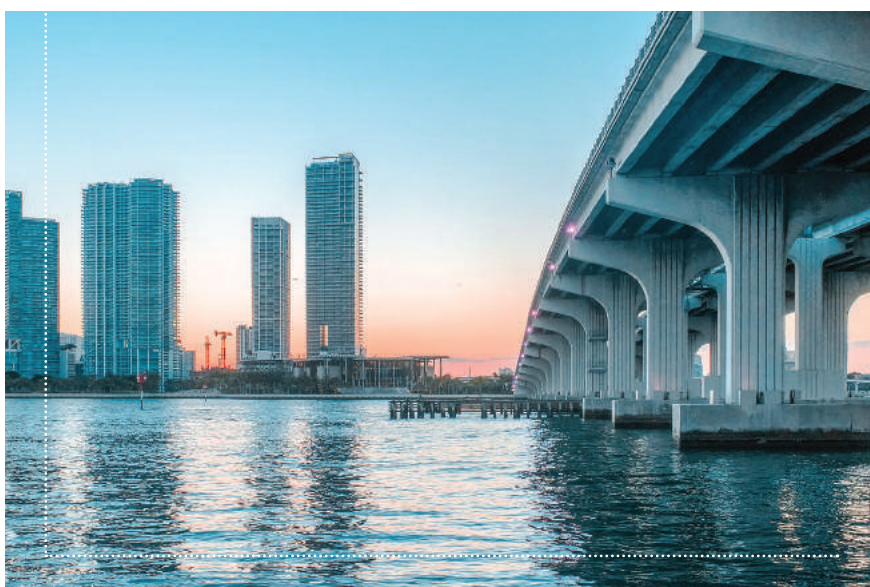

Who we are

StonCor companies are the platform operating companies for RPM Performance Coatings, which has its head office in New Jersey, USA. StonCor companies can be found in Africa, the Middle East, India, South America and Australia and represent the various brands within RPM, including but not limited to; Stonhard, Carboline, Fibergrate, Universal Sealants and Pro-struct.

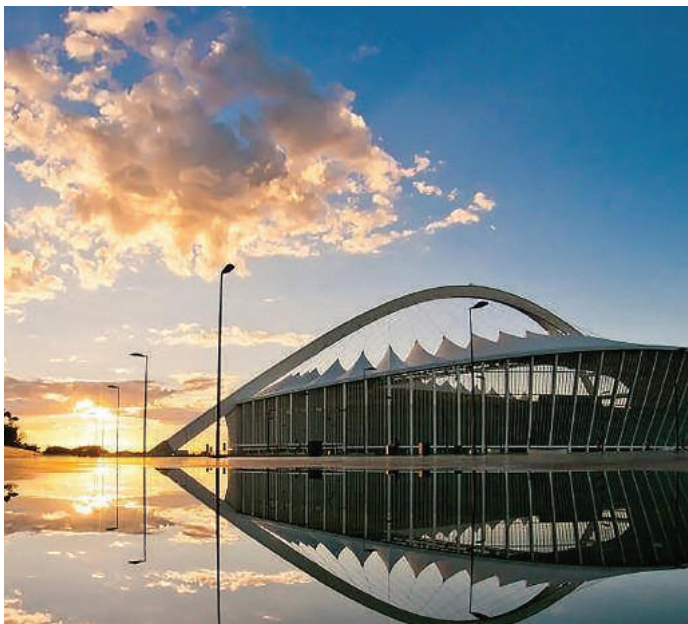

What we do

We pride ourselves in manufacturing, specifying and supplying world class products for a wide variety of construction, repair and specialised rehabilitation projects. We incorporate our knowledge and expertise with new innovation from our global network of technology partners, to lead in the protective coatings, resin flooring, composite gratings, bridge expansion joints and concrete repair markets.

STONCOR

StonCor companies have attained local and global compliance and certifications for meeting various industry standards, tests and approvals. We have built our reputation by establishing relationships and trust with an extensive network of specialist contractors, professional consultants/engineers, industry experts and major asset owners.

Our highly skilled, professional sales teams are backed by in-house engineers, industry specialists and technical support staff to provide the highest levels of service and ensure our products are successfully installed.

Our Brands

STONHARD

Coatings

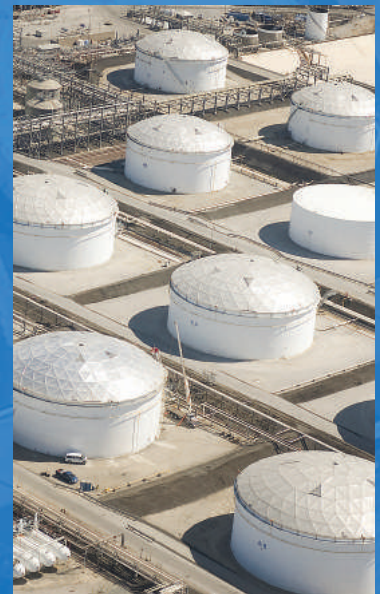

Carboline is a leading global manufacturer and supplier of protective coatings, linings, and fireproofing products. We can meet specifications for all building types, project requirements and conditions with multiple product choices.

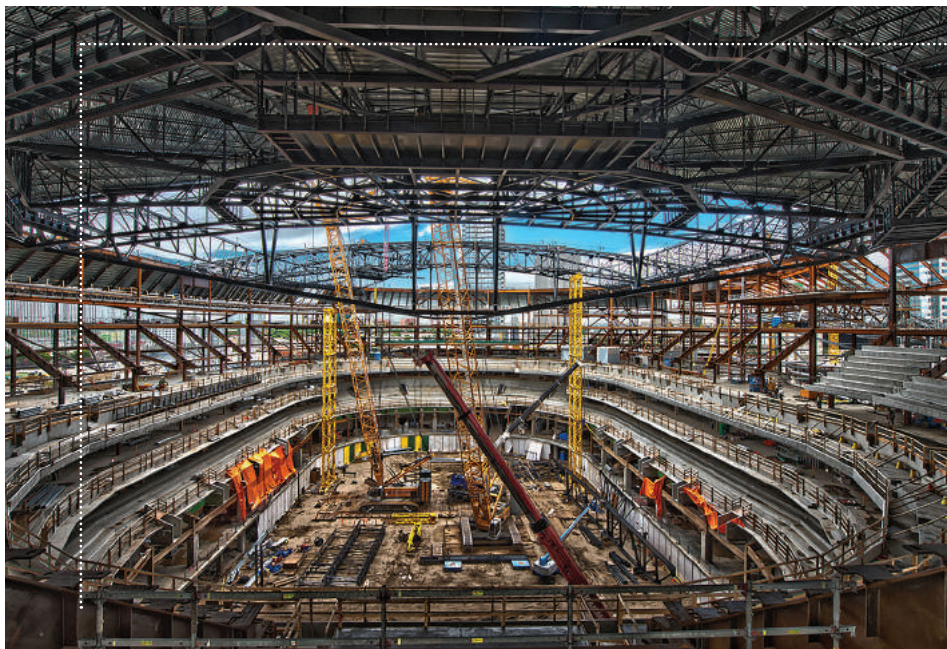

Linings

Carboline offers a variety of tank lining systems and solutions to protect your assets. From time-tested linings to cutting edge polymers, our linings are fully tested and field proven. You can rely on Carboline to protect your tank's integrity.

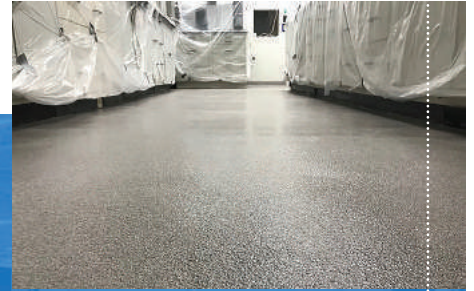

Fireproofing

Carboline's complete line of commercial and industrial fireproofing products offer a level of unparalleled performance in several markets, with various types of intumescent and cementitious technologies designed for industrial, petrochemical or architectural applications.

Industrial Floors

Stonhard is the unprecedented leader in manufacturing, specifying and project management of high performance floors.

Polymer Walls, Floors & Lining Systems

STONHARD

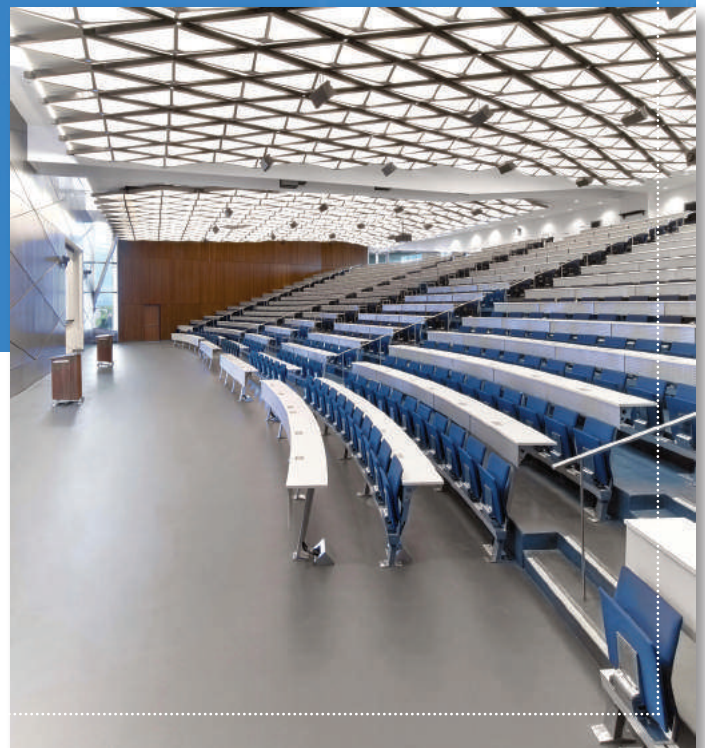

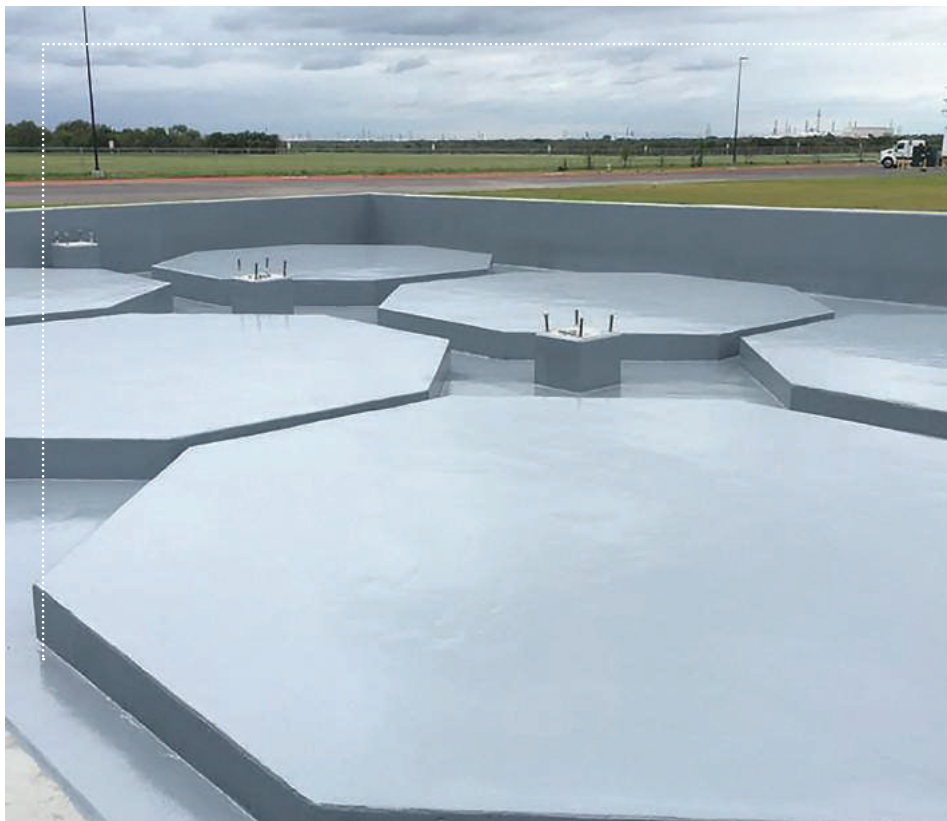

STONHARD

Commercial Floors

Our seamless, long lasting and easy to clean systems, are engineered to protect, maintain and enhance both industrial and commercial environments.

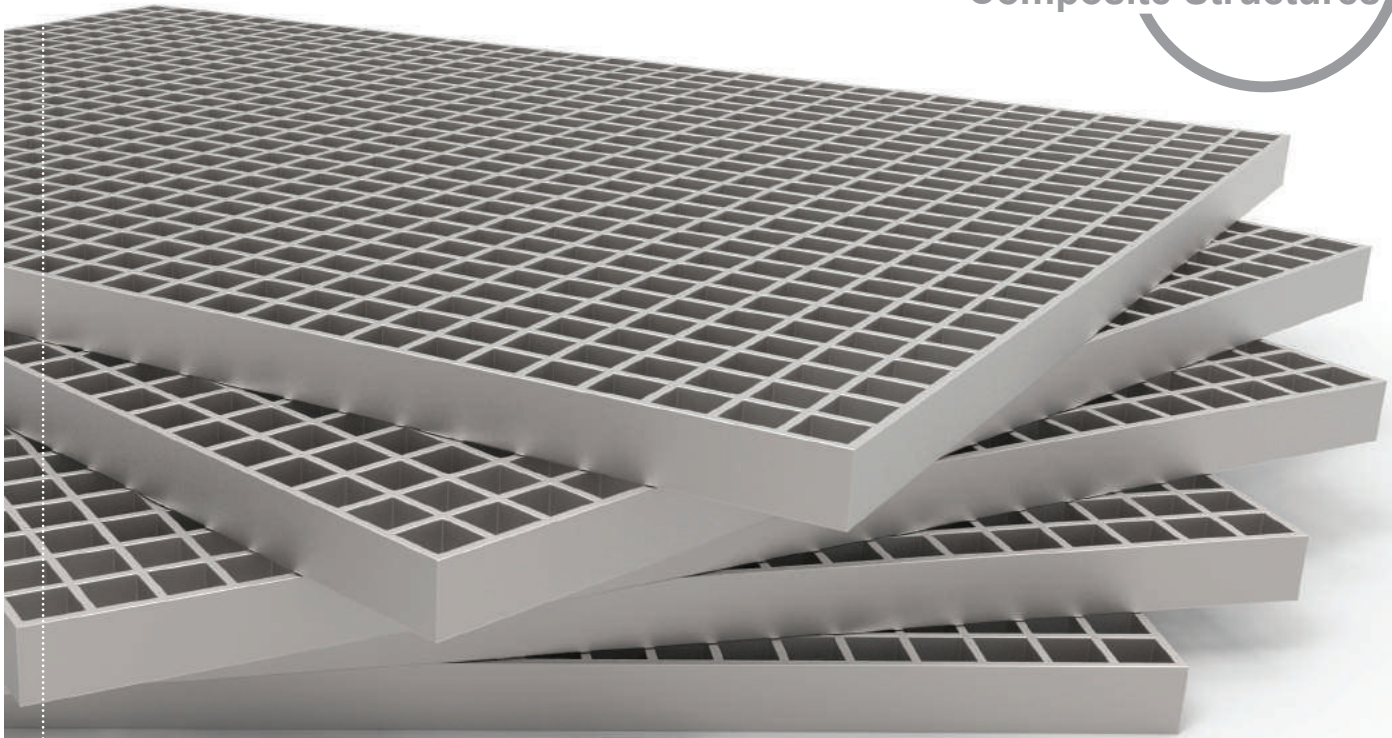

STONHARD

Secondary Containment

The toughest environments require the toughest floor and lining solutions. Chemical, abrasion and impact resistant seamless formulations protect against corrosive attack, heavy traffic and daily abuse. Processing areas, containment, and bulk storage areas are safe with our high performance floors and linings.

Fibreglass Composites

Fibergrate provides turnkey design and fabrication of moulded gratings and fibreglass structures including platforms, cat ladders, stairways, railings and equipment support structures. Our professional engineering and drafting team, can help you find the right solution to meet your needs for longevity, safety and cost. Fibergrate products offer significant advantages over traditional components. They are maintenance free, UV stable, non-slip, non-conductive fire retardant and easy to install.

Structural Repairs & Grouting

For over 50 years Pro-Struct has supplied quality, specialty products for the concrete, civil engineering and construction industry. These include concrete repair mortars, precision grouts, structural adhesives and sealants.

Waterproofing

Our Pro-Struct range offers a variety of acrylic, bituminous and cementitious products, including rapid-set polyureas and waterproofing sheet membranes to provide solutions for concrete roofs and water retaining structures.

Bridge Joints & Bearings

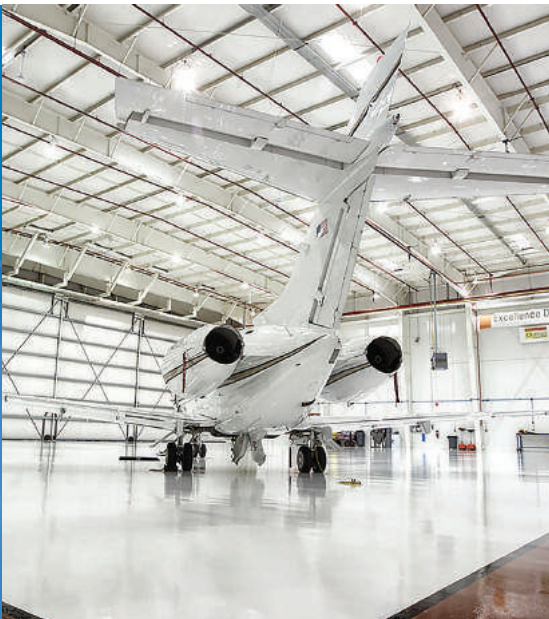

USL provides a complete service to the civil engineering and building industry for bridge deck protection and car park structures, which includes the supply of expansion joints, bridge bearings, surface mounted tactile paving and spray applied bridge and parking deck waterproofing.

All of USL's products have a proven track record and comply with the latest international approvals, backed by USL's own individual client guarantee.
